

UNCLE BUD'S CSS 460 HILLDALE DRIVE NEEDMORE, PA 17238 717-294-6000

# WE ARE EDUCATING THE CONSUMERS... ARE YOU UP TO SPEED?

**BULLS BAGS OUT PERFORM ANYBODY... U.B. CHALLENGES ANYONE... WHAT'S THE QUESTION?**

**COMPARE:** Hughes, Hoppes, Deadshot, Protector, E-Lite, Dog-Gone-Good, Outhers, Steady Shot, Bench Master, Bench Mark, Steady Shot, Dead Shot, Bench Buddy, Shooters Ridge, Stewart Vise, Stony Point, AA&E Leather Craft, Lohman, X-Bag  
**KEY-WORDS... SEARCH ENGINE OTHERS:** Rifle, Gun, Shooting, Target, "REST" 'BAG" etc...

If it looks like Uncle Buds Bulls Bags and its shaped like Uncle Bud's Bulls Bag, but it doesn't say Uncle Bud's Bulls Bag or Browning BULL'S Bag, it won't do what the Bulls Bag claims... Or if it could it would be our original design that is patented. I guess our imitators could be trying to flatter us by presenting products that appear on the surface to be like ours... They have used our example as their benchmark. Thanks for the praise... Guys!

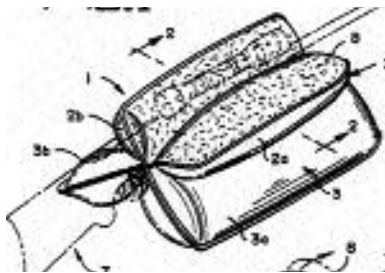

**UNCLE BUD'S BULLS BAGS-GUARANTEED TO OUTPERFORM ALL OTHERS... (OR YOUR MONEY BACK...)  
UNCLE BUD'S BULLS BAGS HAVE A UNCONDITIONAL LIFETIME GUARANTEED. WE REPLACE WEAR AND TEAR N/C  
WHO OFFERS ANYTHING CLOSE?**

And for the records, the term we use is "Reduces Felt Recoil". There's a difference between felt recoil and actual recoil. Felt recoil is what is felt by the shooter when firing a gun. The energy is transferred from the muzzle, to the heel of the gun/stock. This energy is felt by the shooter in his or hers shoulder when held correctly. Uncle Buds reduces "Felt Recoil" by shooting a one bag system, allowing the shooter to get their elbow down (Trigger Arm) which permits the shooter to be in a more natural position as when their shooting off handed. What the shooter feels is a reduction in energy because the natural padding in the shoulder has been increased by this position. Two bag systems and vises can't do what Uncle Bud's does. Also some claim percentages of recoil reduction. Assuming they have come up with an accurate way of measuring this reduction, WE sure would like to have them share those statistics... Uncle Buds expertise and leading engineers tell us that anytime you can truly reduce recoil, like in vises, or bag systems, that don't allow the gun to move freely during recoil, that transfers the energy back and downward towards the base... Uncle Bud's also solved that problem. You will undoubtedly change your point of impact on the target...

**IT IS POSSIBLE THAT WE HAVE THE BETTER MOUSE TRAP. THAT'S OUR GUARANTEE...**

**WHAT MAKES, UNCLE BUD'S COMPLETE SHOOTING SYSTEMS THE BEST ENGINEERED SHOOTING SYSTEMS?**

**IMPORTANT CONSIDERATIONS THAT CONTINUE TO ENSURE THE UNCLE BUD'S CSS ABOVE ALL OTHERS IS  
BASED ON PROVEN PERFORMANCE. AND A LOW CENTER OF GRAVITY**

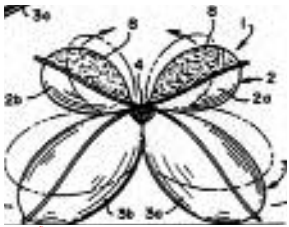

**TECHNICAL DATA EXPERTS & EDITORS CHOICE  
CSS GUARANTEE**

**TECHNICAL DATA:** When Browning Arms was engineering the revolutionary (BOSS System) they called on Uncle Bud's Bench Rest System. 90% of the Browning BOSS was developed and tested on the Uncle Bud's Bulls Bag. Browning learned through Uncle Bud's that clamping your gun in other platforms that have little or no

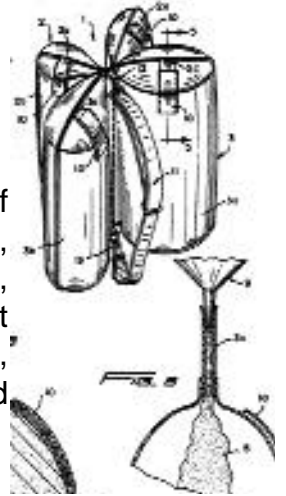

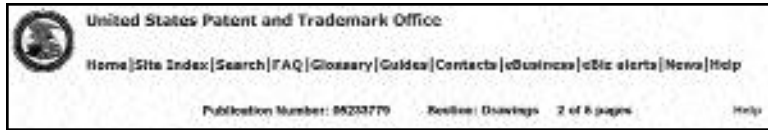

movement will change your point-of-impact. Other devices under the forearm and the heel of the stock can create a flex in the shooting pattern when the shooter applies inconsistent pressure over the trigger. "Only Uncle Bud's Bulls Bag holds your gun the same way you do when shooting without a rest..." *Rob Sheeran, Chief Firearms Technician, Clyde Rose, Quality Control/Test Engineer, Browning Arms Company.*

**TECHNICAL DATA:** Remington Arms Company and Pentax Corporation have on several occasions called on Uncle Bud's Bulls Bags and Benches for use during Dealer and Editor seminars, as well as product demonstrations, showing the best that they have to offer. They, like many other leading manufacturers, believe that our products give them the stability necessary to ensure accuracy and complement their leadership position.

**EXPERT ADVANTAGE**

**EXPERTS CHOICE:** Our products have been requested, used, and praised by some of the largest industry leaders and professionals including: Winchester, Mossberg, Knight, Browning, Remington, Dakota Arms, Leopold, Pentax, Swarovski Optic, Burris, Federal, Barnes Bullets, Olympic Training Centers, Safety Training Facilities, Law Enforcement Agencies, Military and Command Units, National Shooting Teams, Shooting Ranges, Gunsmiths, Outfitters, National and International Distributors, Retailers, Catalogs and leading editors, to name a few...

**WHY UNCLE BUD'S?**

**EXPERT SUPPORT:**

"Uncle Bud's Bulls Bag is a new concept in holding a rifle or handgun solidly when testing accuracy or taking long shots at varmints and big game." Editor's Choice of Gear, *Jim Carmichael, Outdoor Life*

"Excellent device for sighting in or testing lots of loads off the bench." *John Kronfeld, Shooting & Hunters Buyer's Guide*

"Uncle Bud's Bulls Bags are being praised by sporting enthusiasts and law enforcement teams across the country." *Law Enforcement Product News*

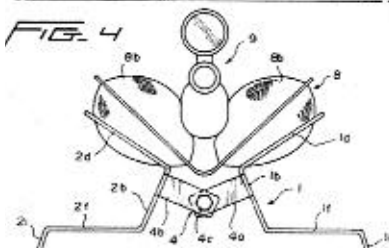

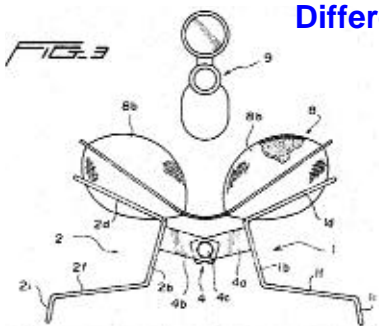

"This past year I found something that everyone who shoots rifles or handguns ought to have. It's Uncle Bud's Bulls Bag." *Art Carter, Sporting Classic*

"Locks the rifle in a vise-like grip. It does what it's supposed to." *Petersen's Hunting*

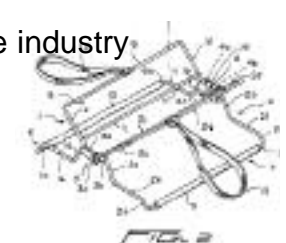

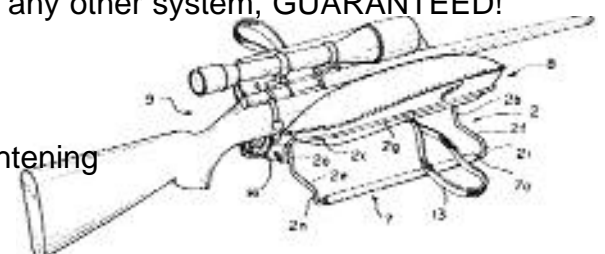

"Uncle Bud's Bulls Bag is the answer." *Bob Forker, Guns & Ammo*

**CSS GUARANTEE:** We continue to promise and GUARANTEE to outperform ALL Others by improving your group and accuracy every time... It's this simple: If you have spent \$20 to \$2000 on a sighting device, Uncle Bud's CSS product known as the Bulls Bag will outperform any other system, GUARANTEED!

**Different Styles for Different Needs**

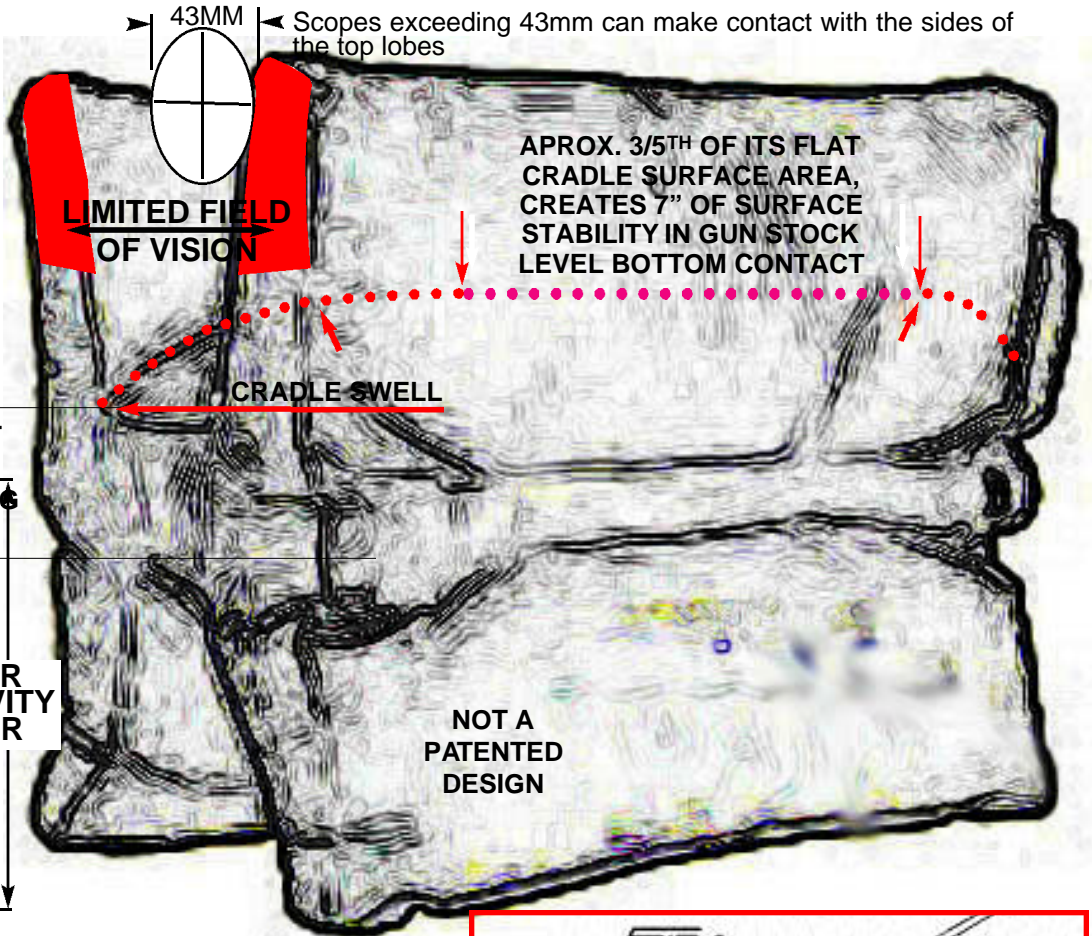

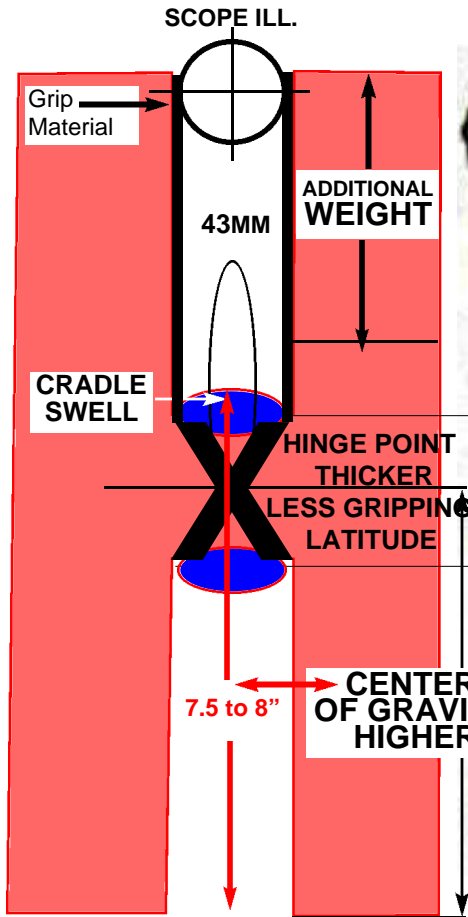

- 4-chamber butterfly design is self-tightening
- Holds your firearm like a vise
- Increases stability
- Reduces the amount of recoil felt by the shooter
- Suede leather helps protect the finish of your firearm - increases friction
- You adjust to the feel you want
- One bag eliminates the need for a 2-bag system
- Does not affect your point-of-impact
- Most compact, user-friendly and effective shooting aid in the industry
